

Module 1: Image Representation, Types of Image Processing & Benefits

➤ Exercise 1: Dimensionality and Data Payload Analysis

Input:

Output:

Module 2: Image Preprocessing (Linear vs. Non-Linear Filtering)

➤ Exercise 3: Noise Characterization and Filter Selection

Input:

Output:

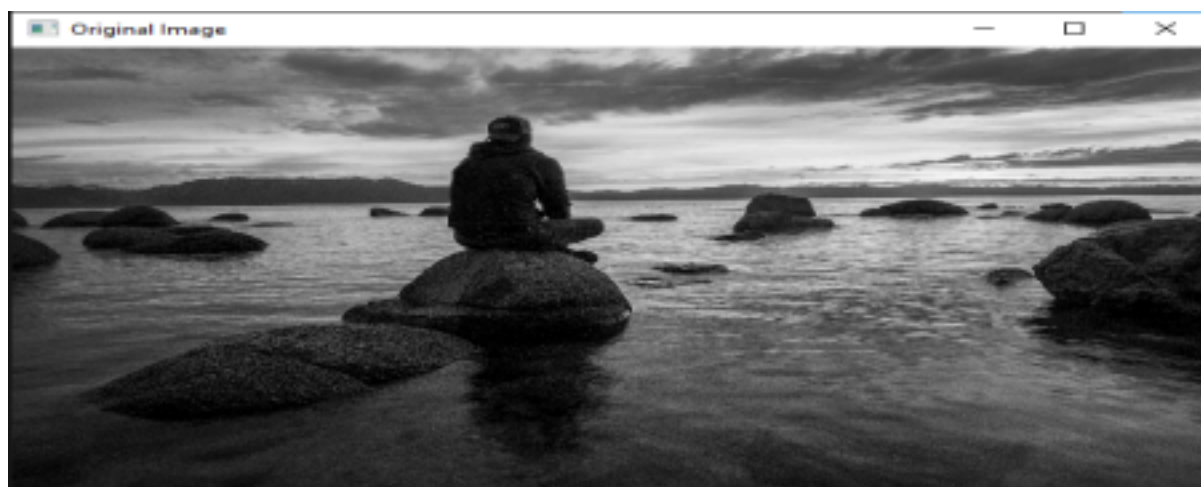

Module 3: Edge Detection (Spatial Gradient Analytics)

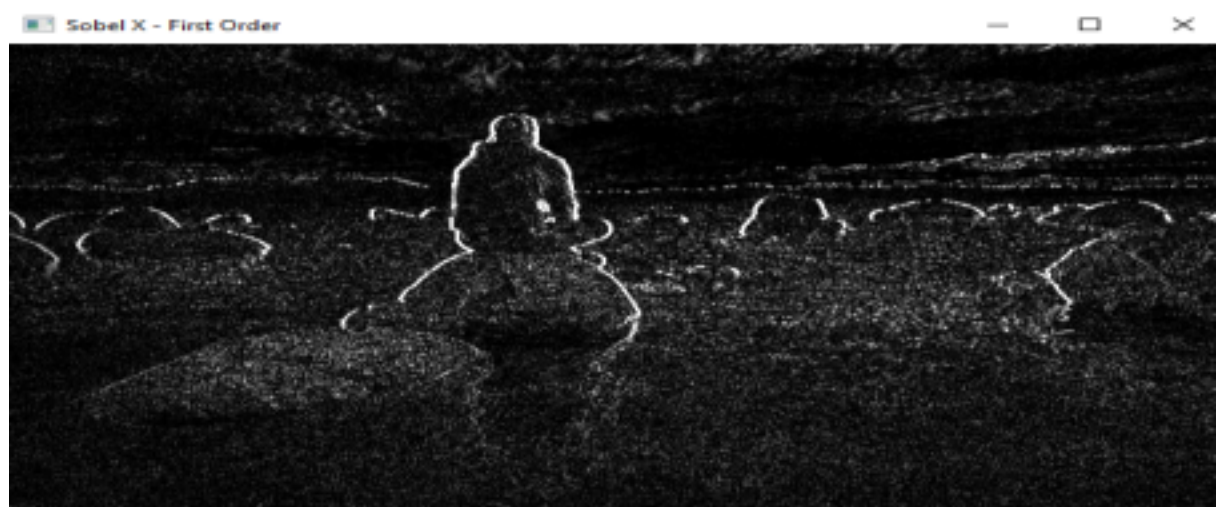

➤ Exercise 5: First-Order vs. Second-Order Gradients

Input:

Output:

Module 4: Corner Detection (Harris Spatial Tensor Analytics)

➤ Exercise 7: Eigenvalue Mapping of the Second-Moment Matrix

Input:

Output:
